Identify Case Study Subjects
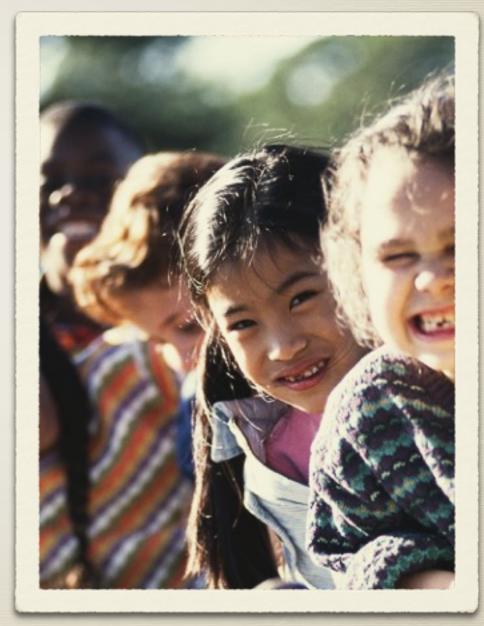

* Review academic records

* Assess in class behavior and textual analysis of student product for signs of low self-efficacy

* Self-administered perceived self-efficacy survey of entire class

* Interviews with potential subjects

* Select for diversity where possible

Perform Interventions

* Perform teaching duties with high expectations for all students

* Perform interventions with high expectations for case studies

* Regular exit tickets for all students

* Take ethnographic notes, regularly share memos and use coordinated code tags

* Interview other teachers and guardians of case study subjects
